

Arrogance: The Fall

1.Uprising 3:05

instrumental

2.Arrogant Fall 3:49

The empire is rising and the arrogants fall
March on to victory, fear the power of my sword
A war full of hatred of men Gods and sons
Will come to an end by the righteous ones

Now we march on forever to the land of the free
Where the weak hold the power and the strong will retreat
Let the tyrants be hanged by the hands of the gods
Who decide when our fate is the guide of a dark path!

Vengeance fight or die

Arrogants fall and the humble will rise
Moving united with hope in our eyes
There's no turning back now there is no excuse
We've so much to gain and nothing to lose

As I feel the war drums in my heart I can see
When united we stand we shall march against thee
The rebellion will rise and those who turn their back
Will diminish and fade by the king's armored hand

An empire has risen from the dust of an old
Holding wisdom and knowledge in the dungeons untold
And when arrogants rule they will fall once again
By the weak and the humble till their time fades away

Again and again.....!!!!

Arrogants fall and the humble will rise
Moving united with fierce in our eyes
There's no turning back now there is no excuse
We've so much to gain and nothing to lose

"Behold, I am against you, Oh arrogant one," Declares the Lord GOD of hosts,
"For your day has come, The time when I will punish you."
Jeremiah 50:31

Arrogant fall and the humble will rise
Moving united with fierce in our eyes
There's no turning back now there is no excuse
We've so much to gain and nothing to lose

3. Flying Away 3:35

Through space and time I have come to this world
Bearing the gift of knowledge to seize and behold
All the sights I have seen all the things I have learnt
Will be with me forever untold and unheard

Drawn towards the end in the spiral of time
Moments and places are fixed in my mind
I stand and watch as you wait for that day
As you wait for that day

And watch us fly away

I 've seen the birth and the death of your sun
When planets collided and galaxies were one
In the Last Great Time War I fought aliens from space
Still I could not avert the end of my race

Drawn towards the end in an infinite march
Been there and back in a beat of my hearts
There's a time like this when all I can say
When all I can say

It's time to run away

Run run run away

Drawn towards the end in an infinite march
Been there and back in a beat of my hearts
I stand and watch as you wait for that day
As you wait for that day

And watch us flying away

4. In the Name of Valor 5:02

Swords in the dust are like lions in cage
Swords held with lust are like lions in rage
A rage unleashed when we're on the stage

Bowing the head is for men with no pride

Wielding the blade is for those on our side
With those on our side forever we'll ride

On snow peak mountains we make our stand
We swim in deep waters and march on hot sand
With no fear we could even fly to the sky
In the name of valor we live and we die

Living afraid is no living at all
Like reaching the end and wait for the fall
Fall with the weak in mind heart and soul

On snow peak mountains we make our stand
We swim in deep waters and march on hot sand
With no fear we could even fly to the sky
In the name of valor we live and we die

In the name of valor
We live and we die

Come break the walls and bend all the bars
No barriers can hold the power in our hands
Hands raised together and aim for the stars

On snow peak mountains we make our stand
We swim in deep waters and march on hot sand
With no fear we could even fly to the sky
In the name of valor we live and we die

In the name of valor
We live and we die

5.The Crown of Evermore 3:59

Just like a vision came in my wildest dreams
Among the darkness and enchanted evil screams
The voice so clearly spoke of past forgotten lore
Of sunken cities and of underwater shores

I travelled deep inside the forest of the lost
I challenged face to face what mankind fears the most
I swam the seven seas and climbed the highest mounts
I crossed unholy lands in search of sacred grounds

With words that never touched the mind of man before
The secret place where lies the crown of evermore
Now I can see what man has never seen before
The holy altar and the crown of evermore

I lift my hand to touch the wonder of all kings
What grants eternal glory and what fortune brings
I hear that voice again that's guiding my pace
Though now I walk away my heart is filled with grace

With words that never touched the mind of man before
The secret place where lies the crown of evermore
Now I can see what man has never seen before
The holy altar and the crown of evermore

Now I can see what man has never seen before
The holy altar and the lost crown of evermore
Now that I see what man has never seen before
No one deserves to wear the blessed crown of evermore

6.Dark are the Eyes of the Night 3:35

You feel the presence of evil its breath on your neck
Consider the slightest mistake the last you will make
Running and hiding won't save you now
The claws of the beast will get to you somehow

Centuries ago your ancestors started the war
Now I return from the grave to settle the score
Too scared to look what's behind your back
The final strike will come forth from the

Dark are the eyes of the night - Watching and waiting ready to strike
Dark are the eyes of the night - You'd better beware of the evil that's there
Dark are the eyes of the night - Watching and waiting ready to strike
Dark are the eyes of the night - Can smell the fear the evil is here

Black wings will cover the night sky the red moon will hide
Kneeling and waiting in silence stripped of your pride
Leading the Order you bear the mark
The final blow, it comes forth from the

Dark are the eyes of the night - Watching and waiting ready to strike
Dark are the eyes of the night - You'd better beware of the evil that's there
Dark are the eyes of the night - Watching and waiting ready to strike
Dark are the eyes of the night - Can smell the fear the evil is here

The evil is here

Dark are the eyes of the night
Dark are the eyes of the night...

Dark are the eyes of the night - Watching and waiting ready to strike
Dark are the eyes of the night - You'd better beware of the evil that's there

Dark are the eyes of the night - Watching and waiting ready to strike
Dark are the eyes of the night - Can smell the fear the evil is here

7. Pandora's Gift 4:32

Tree of knowledge tree of guilt
Towers rise and fall as they're built
Book of wisdom, dust to dust
Evil touch derived from greed and lust

Above the earth on fiery wings
Down below the great city sinks
Bringer of the Holy fire
Bloody cape of a poisonous liar

Lo and behold the clouds will lift
Lock , hide away Pandora's Gift
Lo and behold the clouds will lift
Lock , hide away Pandora's Gift

Water up to the mountains top
Ignore the flames don't turn around don't stop
Giant warrior on the ground
Golden icon scattered all around

Lo and behold the clouds will lift
Lock , hide away Pandora's Gift
Lo and behold the clouds will lift
Lock , hide away Pandora's Gift

Lo and behold the clouds will lift
Lock , hide away Pandora's Gift
Curious mind in restless drift
Opens up Pandora's gift

8. In Another Time 4:04

Have spent those years in this dark cell just waiting alone
All alone
Please let me out of this nightmare I live on my own
I'm on my own

Just an illusion or God sent saviour to trust,
I want to trust

I have seen your other face in another time in another place
I have felt my burning tears in forgotten times in forgotten years
I believed and I felt the pain in another time in another plane

Led, betrayed, words I was told in some other life in some other world

I touch the rays of light shown under my door
My locked door
The only warmth that I've felt in my hands, but what for?
What for?

Once promises now are dreadfully fading to dust
Fading to dust

I have seen your other face in another time in another place
I have felt my burning tears in forgotten times in forgotten years
I believed and I felt the pain in another time in another plane
Led, betrayed, words I was told in some other life in some other world

I have seen your other face in another time in another place
I have felt my burning tears in forgotten times in forgotten years
I believed and I felt the pain in another time in another plane
Led, betrayed, words I was told in some other life in some other world

Words I was told
In some other world
In some other world

9.Sanctuary for All 5:03

They are living in the darkness on the verge of mass extinction
Tried and found guilty in the human jurisdiction
They were lured out of their lairs to the sunlight they were driven
Promises of freedom but no sanctuary was given

And I wonder if the fires that are burning in the streets
Are the anger and the fury of these god forsaken beasts

They are searching for a haven and their only hope's to find her
Scared and confused while they're hiding in the gutter
On the path to freedom no one can calm their rage
On the lands the seas the air is where their wars wage

And the nights are getting darker there is death all you see
For the final retribution comes when all are living free

Rise up, ready to fight (fight fight fight)
Praise the damned phantoms of the night (Praise the damned)

Sanctuary for all (Sanctuary for all)

And when no one seems to keep their side of the pact
All our hope is lost and the final plan takes act

When the countdown is ending now I know what I have done
Final words we'll ever hear "Sanctuary for none"

And the nights are getting brighter there are flames all around
For the new empire is here and it's rising underground

Rise up, ready to fight (fight fight fight)
Praise the damned phantoms of the night (Praise the damned)

Sanctuary for all (Sanctuary for all)

Nos venimus - Mortiferis
Hostis humani generis
Carpe noctem - Bestia surge
Contremisce et effuge
ab initio ad infinitum
Ad victoriam - Sanctuarium

10.No Angel's Face 5:23

In my dazed and riddled mind
I found what darkness could not hide
In a blurred and misty place
I have found the way out of this maze

Searching for a ray of light
In the land of no delight
I thought I heard her voice at last
could it be a memory from the past

Come take my hand
Come walk with me
My humble spirit longs to be free

And then I felt a warm embrace of a lady in white lace
Could my mind play wicked games, is this the angel's face?

In my dazed and riddled heart
I found what death can't do apart
She keeps returning in my dreams
What if it is more than it seems?

I wish one day I'll find the strength
And follow her in my dream's depths
Until this day i will pretend
And live a dream that will never end

Come take my hand
Come walk with me

My humble spirit longs to be free

So I wait til she appears and I cast away my fears
Tightly grip the hand she offers seems to ease the pain she suffers

Then I felt a cold embrace
Now I'm forever in her place
Doesn't seem so warm and bright
Now I'm begging for a beam of light

And forever I'm condemned
to a nightmare without end
Endlessly I'm trapped inside
a world I have created in my mind

Come take my hand
Come walk with me
My humble spirit longs to be free

And I felt the cold embrace of a lady in black veils
It's my mind playing wicked games this is no angel's face...
