Ark of Time

1.The Postludian race 3:45

Last of the human race live under a mountain side
Built up a wall all around to protect and to hide
With only one hope in our mind all life form is gathered here
Continue the legacy until the atmosphere is clear

Technology is on our side but how much the dome will hold
None will withstand the pollution, the hunger the cold

The Postludian race caught up in a race for the survival of
The Postludian race without a trace death comes from up above
The Postludian race...

Four hundred thousands of souls living in harmony
Could be the example of a perfect society
All men are equal even the last in the line
Work for the same cause survival of humankind

One with the nature under the same freezing sun
The punishment for what our ancestors have done

The Postludian race caught up in a race for the survival of
The Postludian race without a trace death comes from up above
The Postludian race...

Radioactivity levels are starting to rise
Seems like a decade until we meet our demise

The Postludian race caught up in a race for the survival of
The Postludian race without a trace death comes from up above

The Postludian race caught up in a race for their survival
The Postludian race without a trace, the ending’s arrival

The Postludian race...

2.The Stars are Our Destiny 5:25

The end of time has come no way to avoid our fate
The government has launched the program called “The Escape”
The brightest of our race are gathered from afar
The fate of every living creature is the way to the stars

The stars are our destiny, the stars so far away
The stars are our destiny, we’re on our way
We’re on our way to the stars

The plan is on the table for everyone to see
And make the hard decision with responsibility
Will ever come a day when we‘ll regret all these?
But now the one and only way out is the galactic seas

The seas are our destiny, the seas so far away
The seas are our destiny, we’re on our way
We’re on our way to the seas

Racing with time, working our way to the skies
There’s no future here, our planet dies…

The stars are our destiny, the stars so far away
The stars are our destiny, we’re on our way
We’re on our way to the stars,
To the stars, to the stars

We’re on our way
We’re on our way

3.Ark of Time 4:57

The scientists are here it’s time for the last simulation
The deadline was set ten years with no deviation
And now we have the ship
The greatest our planet’s ever seen

Will be the home of our new population
Home of the current and every next generation
Take us away to a place
That lies beyond the outer space

The forests where horses once run now are sector 4
The rivers, the valleys and the skies behind a door
The sea is calm below
The mountains are covered full in snow

Ten thousand civilians aboard we can’t afford more
Hundred of thousands are lying in their sleeping pods
Will ever wake up again
Or was all this totally in vain?

All behold the Ark of time
Life of our planet is thriving inside
All behold the Ark of time

Away from the dark past and fly into the sky

The Ark of time

All behold the Ark of time
Life of our planet is thriving inside
All behold the Ark of time
Away from the dark past and fly into the sky

4.Secrecy 4:03

I am the ruler, I'm the law, I am the king
Sitting on my throne why wanna change a thing
No one remembers why we traveled so far away
Keep it a secret and life will always go this way

Tales go back to a time where there was a planet earth
Wipe it from memories it's just another myth
This warship was our home and this will always be
What's needed will have to be done so our cause will be served

Our secret is preserved
Secrets are meant to be kept but no one can see

It's the Secrecy not all can see
The order's direct we shall protect our dynasty
It's the Secrecy and no one can see
The order's direct we shall protect our legacy

I am the prophet, I am the author of history
Our past won't be revealed will remain such a mystery
Who cares what happened in the past so many years ago
What's right is only what we let them believe
Our secret shall live

Secrets are meant to be kept but no one shall know
And no one can see

It's the Secrecy not all can see
The order's direct we shall protect our dynasty
It's the Secrecy and no one can see
The order's direct we shall protect our legacy

It is our secret of our legacy
Still no one knows where we go
It is the power of our dynasty
And no one, yes no one shall know

5.Warship, Our god 5:12

We need to create a God rebellion’s growing fast
Made this ship and all of us from dust
Thousand years ago he placed us on this ship
Drifting into space eternally

Under command we live by His rules
We are in charge we are handling the fools
All these fools

Worship our God or die under His Hand
Lift your hands in praise and join our ways
Worship our Warship I’m your guide you’re the sheep
Leave the past behind and follow us blind

Who are spreading lies for all these years
Poisoning minds with false ideas
Arrest them all for the greater good
They believe not what they should

Under command we live by His rules
We are in charge we’re handling the fools
All you fools

Worship our God or die under His Hand
Lift your hands in praise and learn our ways
Worship our Warship I’m your guide you’re the sheep
Leave the past behind and follow us blind

Under command we live by His rules
We are in charge we’re handling the fools
All you fools

Worship our God or die under His Hand
Lift your hands in praise and use our ways
Into the unknown where no one’s ever gone
Leave the past behind and follow us blind

6.We Shall Rise 4:30

Have you heard the rumors that are in the air
Be careful open your ears but don’t say a word
We shall unite and fight for a cause that is fair
United we’ll fight for a cause that shan’t go unheard

So we shall rise
Take the future and hold it in our hands
Take no more lies

We'll rise together as one and make our stand

Olders are telling tales of a planet destroyed
Hundreds of thousands left in the search for a new home
Year after year we're traveling blind in the void
Year after year in the space not knowing where we roam

So we still rise
Won't let the future just slip away
Feed them with lies
We got the power and we surely got the way

See all these riots send out the unit
Hunt them down and put them in jail
Our plan is so perfect can't let them ruin it
Shout to all those that they're bound to fail

So we still rise
Won't let the future just slip away
Feed them with lies
We got the power and we surely got the way

So we shall rise
Take the future and hold it in our hands
Take no more lies
We'll rise together as one and make our stand

We shall rise

7.Wings of Steel 4:57

There is a planet where we could settle,
make a beginning anew
Just send a team to explore the terrain
then we should know what to do

Oh oh ...You should not leave the ark
Oh oh ...You'll be left in the dark

Prepare the shuttle the probe we have sent
shows conditions are right
I got the feeling that this is the answer
of our prophets foresight

Oh oh ...Feel the future's at hand
Oh oh ...We will step on new land

Fly through the dark - Our fate is guided by our will
Fly through the dark - Upon the wings of steel

Something is wrong there is a force field,
gravity is pulling us down
Speed up at full speed, rewire the power,
turn the thrusters around

Oh oh ...Land is covered with ash
Oh oh ...Prepare for the crash

Fly through the dark - Our fate misguided by our will
Fly through the dark - Upon the wings of steel

You saw what happens to those who defy us
those who deny our ways
This is the way we survived all these years
and this will never change

Oh oh ...This ship is our Land
Oh oh ...They are punished by God

Fall through the dark - Our fate misguided by our will
Fall through the dark - Upon the wings of steel

Fall through the dark - Their voices calling for us still
Fall through the dark - Upon the wings of steel

8.Unveiling the Truth 5:16

Something’s going on deep inside the ship
The time we were waiting for, won’t let it slip
Troops are moving on everyone is inside
This is our chance to find out what they hide

Sliding, climbing hiding in manholes
Why all this secrecy it makes no sense at all
Allied with the darkness I’m slipping through the guards
The gate opens up and everyone understands

The truth will come forth fed up with the lies we have been told
But now I stand before...

Gather together and let everyone know
Challenge the authorities bring them off their throne
Out on the streets our flag we’ll raise
They will pay for the crimes against our race

The truth will come forth fed up with the lies we have been told
But now I stand before...

The truth is unveiled fed up with the lies they’ve said

But now I stand before the sleeping pods

Stations will broadcast the proof over the waves
They retreat back for their last days
Paint every wall with the word “Unveiled”
For now they finally know their plan has failed

The truth will come forth fed up with the lies we have been told
But now I stand before...

The truth is unveiled fed up with the lies they’ve said
But now I stand before the sleeping pods

The truth will come forth fed up with the lies we have been told
But now I stand before...

The truth will come forth fed up with the lies we have been told
But now I stand before...

9.Silent Dawn 1:19

Instrumental

10.The Final Battle 4:06

We got a plan and all the power
all the force and all the might
All these years in ignorance
we could not tell what’s wrong or right

Thousands are marching in the streets
it’s time we’re bringing down their wall
Nowhere to run no place to hide
there comes a time when arrogant fall

Troops are retreating they even join our forces
Those who deny are taken prisoners of war
Their king has no chance trading kingdoms for horses
We will bring back forgotten times of yore

The final battle no place to hide
Prepare the shuttle and strike them from outside
The final fight the final war
And then when all around is quiet we’re free, we’re free forevermore

I’m in my shuttle out in space
but I swear I will come back
Watching and have them on radar

wait for the right time to attack

Received a signal for the hit
they are retreating one by one
Sirens wail, the lights flash
oh my God what have they done?

Biohazard signs are everywhere
Could not imagine they would start this chemical hell
Attack the human DNA no one to spare
Our ship is now no more than an empty shell

The final battle everything is wrong
I ‘m not afraid to die but scared to live alone
The final fight ended the war
A moment just destroyed what we have started centuries ago

What started centuries ago
What started centuries ago

11.Last of Once Race 3:53

I am the last of once race I’ve seen the end of our days
I am the last of once race I’ve seen the end…
I am the last of once race I’ve seen the end of our days
I am the last of once race I’ve seen the end…
The end of our race Life support kicked in and cleared the atmosphere
No chemicals inside the ship, there’s not a trace
Bodies are lying everywhere, get them out of here
Open the hatches and dump them out in space

Surrounded by pure nature in this silent place
Is really this the end of the Postludian race?

I am the last of once race I’ve seen the end of our days
I am the last of once race I’ve seen the end…
I am the last of once race I’ve seen the end of our days
I am the last of once race I’ve seen the end…
The end of our race

Look at the pods they are sleeping not knowing a thing
Should I wake them up and start all over again?
Is there a chance the human race surviving all of these
And make not the same decisions back as then

And so I sit alone inside this traveling world
Nothing should ever change for what it’s worth

I am the last of once race I’ve seen the end of our days

I am the last of once race I’ve seen the end…
I am the last of once race I’ve seen the end of our days
I am the last of once race I’ve seen the end…
The end of our race

I am the last of once race I’ve seen the end of our days
I am the last of once race I’ve seen the end…
I am the last of once race I’ve seen the end of our days
